

Views on The Chart of Madrid in detail

Relation between 2015 house prices (€/m2) and votes to the 4 main parties in 2015 elections to City Hall

Neighbourhoods with high housing prices are more likely to vote for right-wing parties. And neighbourhoods with low housing prices are more likely to vote for left-wing parties. In Recoletos, where house prices are 5843€/m2, PP, a right-wing party, got 63.9% of the vote, while Ahora Madrid, a left-wing party, got 11.5%. In Palomeras Bajas, where house prices are 1402€/m2, PP, a right-wing party, got 18.6% of the vote, while Ahora Madrid, a left-wing party, got 48.2%.

Relation between house prices (€/m2) in 2015 and passenger cars per 100 inhabitants

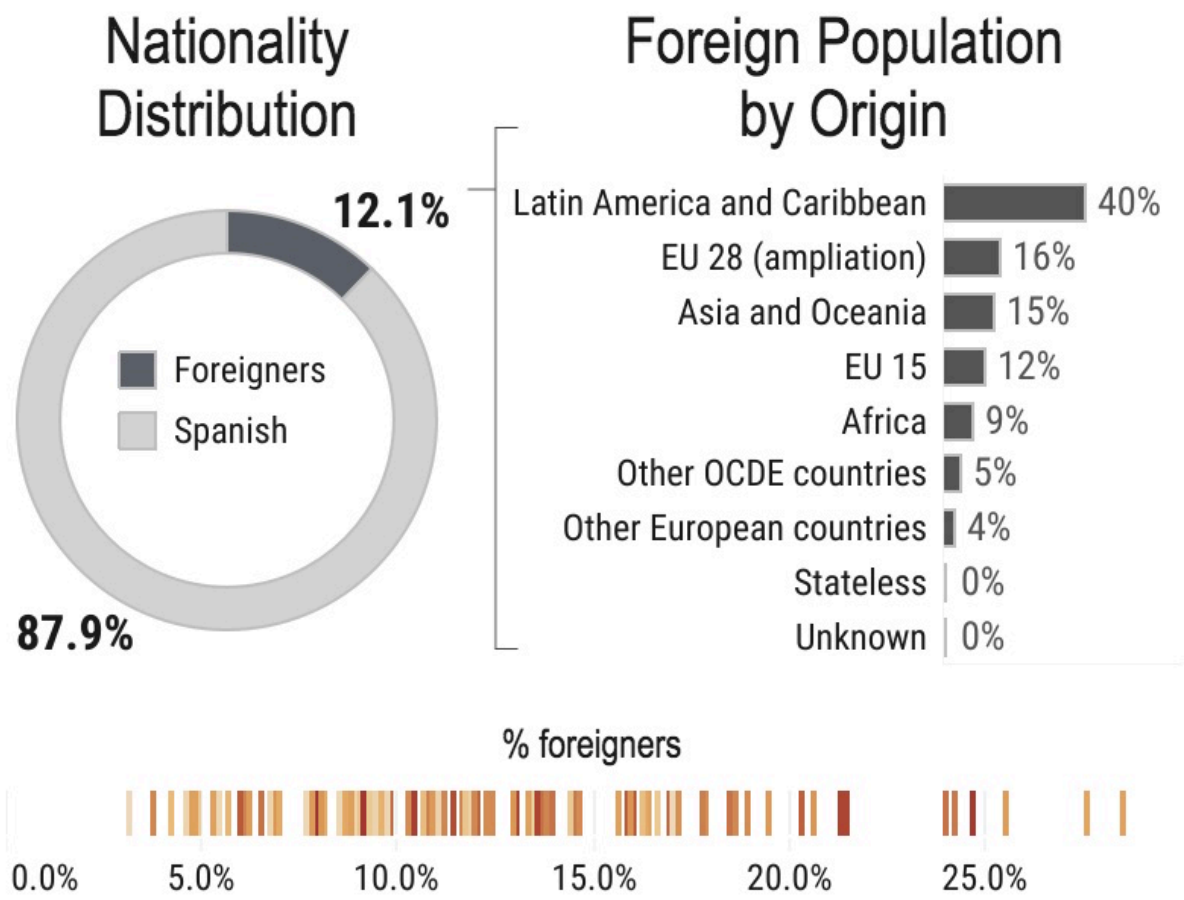

The higher the housing price, the higher the car ownership, and the lower the housing price, the lower the car ownership. Recoletos, with the highest housing price, had 68.12 cars per 100 residents, while San Cristobal, with the lowest housing price, had 25.14. In Madrid, the average number of cars per 100 inhabitants is 39.6.

Distribution of foreigners

In Madrid, 87.9% are Spanish and 12.1% are Foreigners, 40% of whom are Latin America and the Caribbean, the highest percentage.

Foreigners accounted for between 3.1% and 28.5% of all neighbourhoods, with the highest proportion in Pradolongo and the lowest in El Pardo.

There's a big spread in the percentage of foreigners in the different neighbourhoods, with neighbourhoods like El Pardo, Estrella, Horcajo or Atocha with less than 5% of foreigners whilst others, especially in the south-west of the city, like Pradolongo or San Cristobal have around a 25% of foreigner population.
